

Your final-year students, **on the platform before they graduate.**

Sisi Nurse (sisinurse.africa) is "a nurse on your phone" — patients talk to Sisi, and Sisi connects them to real, identity-verified nurses and doctors. Every year your school graduates capable nurses who wait months for placement. This partnership onboards your final-year class onto the platform before graduation, so the day their licence is confirmed, they have a verified profile — and patients.

WHAT YOUR STUDENTS GET

A verified professional profile

Every student is identity-verified through AfrilD, Agodi's identity network. At graduation they hold a professional profile that proves who they are and what they're qualified to do.

Patients from day one

Once licensed and activated, Sisi routes real patients to them — telehealth consultations and follow-ups, without waiting years for a hospital posting.

Income & independence

Flexible, platform-based earnings they control — alongside a job, further study, or while waiting for placement. A career that starts at graduation, not after it.

HOW THE PARTNERSHIP WORKS

1

MOU with the school

Simple agreement: your school becomes a Sisi Nurse talent partner.

2

Final-year onboarding

One session with the graduating class — platform, profiles, expectations.

3

AfrilD verification

Students verify identity and credentials while still on campus.

4

Licence confirmed

Graduates activate once registered with the nursing council (NMCN / SANC).

5

Earning & reporting

Activated alumni take patients; the school gets cohort employment data.

Students practise on the platform only after their professional registration is confirmed — before that, onboarding covers profiles, verification and telehealth training.

WHAT THE SCHOOL GAINS

- ✓ **An employability answer:** "our graduates are on a health platform earning within weeks of licensure."
- ✓ **Telehealth exposure** for students before they graduate — the direction healthcare is going.
- ✓ **Cohort data** for accreditation and marketing: activation and earnings reports per graduating class.
- ✓ **Zero cost** to the school — this is a talent partnership, not a purchase.

WHAT AGODI PROVIDES

- ✓ **Onboarding sessions** for every final-year cohort, on campus or virtual.
- ✓ **Priority AfrilD verification** for your students — partner schools jump the queue.
- ✓ **Telehealth training material** for safe, professional remote care.
- ✓ **A named partner contact** at Agodi for the school.

FOUNDING COHORT OFFER

We are selecting founding nursing-school partners in Nigeria and South Africa. Your current final-year class onboards free, with priority verification and activation support — in exchange for feedback and a joint case study on graduate outcomes.

ONGOING PARTNERSHIP

- ✓ Every new final-year class onboards each year.
- ✓ Platform fees come from consultations — never from students upfront.
- ✓ School featured as a talent partner on the platform.
- ✓ No exclusivity, no lock-in.
